PROFESSIONAL SUMMARY

Final-year B.Tech student and AWS Certified Cloud Practitioner specializing in Full-Stack Development. Skilled in building scalable web applications with REST APIs, authentication, and database systems using MERN stack. Strong foundation in Data Structures, Algorithms, and Object-Oriented Programming. Experienced in developing responsive, high-performance applications and integrating AI solutions using LLMs, AI agents, and RAG.

EDUCATION

Ajay Kumar Garg Engineering College

B.Tech-ECE

2022 – 2026

Ghaziabad, Uttar Pradesh

Christ The King Inter College

12th Standard

2021 – 2022

Tundla, Uttar Pradesh

WORK EXPERIENCE

Web Developer Intern – Delhi Metro Rail Corporation (DMRC)

Jun 2025 – Jul 2025

(New Delhi, India)

- Developed a **Lost & Found portal** to report and retrieve lost items through a secure online system.
- Enabled item verification and handover by DMRC officials using a structured request and validation workflow.
- Built scalable full-stack application using ReactJS, TailwindCSS, Express, MongoDB, and JWT authentication.
- Improved item recovery turnaround by providing commuters a transparent and verifiable digital interface.

PROJECTS

Mind-Space

[View Project]

- Designed and developed a **full-stack** mental wellness application with real-time mood tracking and analytics dashboard, improving user engagement and providing actionable data insights
- Developed an interactive **Dashboard** for real-time mood insights and trend visualization.
- Implemented a **Personalized Recommendation System** and AI wellness coach
- Integrated **JWT authentication**, responsive UI, and optimized app performance.
- Tech Stack:** ReactJS, Tailwind CSS, Node.js, Express.js, MongoDB.

PREP&RISE

[View Project]

- Developed an AI-powered interview preparation platform with **Vapi's** voice agents, enabling users to practice through real-time conversational simulations and receive instant feedback
- Built modern, responsive interface with **NextJS** and **Tailwind CSS** for seamless user experience
- Implemented secure authentication and real-time data storage using **Firebase**
- Tech Stack:** NextJS, Tailwind CSS, Vapi, Firebase

SHIELD

[View Project]

- Developed an IoT-based system integrated with an **AI model** to detect abnormal patterns in electrical parameters and predict overload/short-circuit faults, identifying faulty components in real time
- Built a MERN dashboard with **WebSockets** for 24/7 live monitoring and instant alerts which are preserved in the database for tracking and analysis
- Tech Stack:** ReactJS, Node.js, Express.js, MongoDB, WebSockets, ESP32, AI (Anomaly Detection)

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, SQL

Generative AI: Agentic AI, RAG, Multi-agent Systems, LangChain, LangGraph, VectorDB, MCP

Technologies/Frameworks: ReactJS, NodeJS, Express, NextJS, MongoDB, REST APIs

Cloud/DevOps: AWS (EC2, S3, IAM, Lambda), Docker

Developer Tools: VS Code, Git, GitHub, Postman

CERTIFICATIONS

- Full-Stack Generative and Agentic AI
- AWS Certified Cloud Practitioner
- Web Development Fundamentals–IBM
- Fundamentals of ML with scikit-learn
